

Das E-Haus

Part 3: Programme

The following general programme forms the basis for the apartment:

- 1 Livingroom
- 1 Kitchen
- 1 Master bedroom
- 2 Children bedrooms
- 1 Study
- 2 Bathrooms
- 1 Guest WC
- 1 Storage room
- Rooms for technical equipment
- Charging zone for the E-car (covered)
- Optional charging one for 4 E-bikes (frost protected)

Modifications to the programme are generally possible if these are sensible for the design. The task is to design a solution for the components necessary for the energy surplus.
